PROFESSIONAL SUMMARY

Detail-oriented **Data Analyst Intern** with experience in **data cleaning, reporting, and performance analysis** using Excel, SQL, Python, and Power BI. Skilled in transforming large datasets into actionable insights through **data validation, KPI tracking, and trend analysis**. Experienced in creating **interactive dashboards and automated reporting workflows** to support business decision-making. Familiar with **Excel Pivot Tables, VLOOKUP, SUMIFS, and digital campaign performance metrics**. Strong analytical mindset with high attention to data accuracy and reporting quality.

CORE SKILLS

- **Data Analysis & Insights:** Data Cleaning, Data Validation, Exploratory Data Analysis (EDA), KPI Tracking, Trend & Anomaly Detection, Business Performance Analysis
- **Reporting & Excel Analytics:** Microsoft Excel (Pivot Tables, VLOOKUP, IF formulas, SUMIFS), Data Cleaning & Formatting, Report Generation, Data Accuracy Validation
- **Programming & Databases:** Python (pandas, NumPy), SQL (MySQL, PostgreSQL – joins, aggregations, data querying)
- **Visualization & Reporting:** Power BI (DAX basics, slicers, drill-down dashboards), Excel Reporting
- **Analytics Foundations:** Basic understanding of Digital Marketing Metrics (CTR, CPM, Impressions, Reach, Conversion Rate)
- **Professional Strengths:** Analytical Thinking, Attention to Detail, Data Accuracy, Documentation, Stakeholder Communication

EXPERIENCE

Data Analyst Intern

Abhyaz – MTAB Technology Center

May 2025 – Sep 2025

- Collected, cleaned, and validated structured datasets using **Excel, SQL, and Python** to ensure high data accuracy and consistency.
- Generated analytical reports and dashboards to track **business KPIs and performance trends**.
- Developed **Power BI dashboards** for monitoring metrics and identifying operational anomalies.
- Performed **data validation across multiple data sources** to maintain reporting reliability.
- Automated data processing workflows that improved reporting efficiency and reduced manual work.
- Collaborated with internal teams to resolve **data inconsistencies and reporting issues**.

PROJECTS

1. AI-Driven Resume Screening System

GitHub: <https://github.com/tarak-muthaluru/resume-screening-system>

- Built an NLP pipeline to analyze and rank resumes against job descriptions using **semantic similarity models**.
- Applied **Sentence Transformers and cosine similarity** for candidate ranking.
- Deployed the solution using **Streamlit** for interactive analysis.

2. Retail Sales Performance Dashboard (Power BI)

GitHub: <https://github.com/tarak-muthaluru/Retail-Sales-Performance-Customer-Insights-Dashboard>

- Analyzed transactional sales datasets to identify **revenue trends and product performance insights**.
- Built interactive **Power BI dashboards** with DAX measures and drill-down features.
- Improved reporting efficiency by **70% through automated dashboards**.

EDUCATION

Bachelor of Technology – Electronics & Communication Engineering

Nehru Institute of Engineering and Technology | **2020 – 2024** | **CGPA: 7.8**

CERTIFICATIONS

- Data Science Certification – CedLearn Institute
- Machine Learning & Data Visualization – Infosys Springboard
- Python Essentials 1 & 2 – Cisco Networking Academy

Languages: English, Telugu | **Availability:** Immediate | **Willing to Relocate**
